SUMMARY

I'm a software engineer with experience building websites and web applications, from concept to delivery using web technologies and techniques. Collaborates with content editors, designers and product owners to create robust web solutions for everyone involved.

EXPERIENCE

Web Developer / Software Engineer

SEPTEMBER 2008 - PRESENT

Freelance, San Francisco, CA

- Developing tailored web solutions for clients.
- Using React, Javascript, Typescript and frameworks such as Gatsby, Nextjs or Astro.
- Content management with Contentful, Sanity and other platforms.

Senior Software Engineer

JUNE 2025 - DECEMBER 2025

F5, Remote (Contract)

- Migrated the [f5.com](#) website infrastructure from AEM to Sanity CMS and Nextjs.
- Enhanced the content editor experience, and increased velocity in the process.
- Managed PRs, workflows, and code quality in Azure DevOps for the frontend.
- Built reusable React components to support rapid launches and consistent design across teams.

Web Developer / Software Engineer

JANUARY 2023 - JUNE 2024

ON, San Francisco, CA

- Migrated the marketing website to Contentful CMS, with Gatsby, GraphQL and React, which improved content entry experience and increased publishing speed by 80%, resulting in a more efficient workflow for the marketing team.
- Implemented robust CI/CD publishing pipeline using GitHub Actions and Webhooks.
- Developed and integrated features for ON's B2B portal for customizing conversational AI chatbot with React, TypeScript, and Web Components.
- Contributed to a no-code Canvas drag-and-drop solution for building chatbot workflows.

Web Developer / Software Engineer

FEBRUARY 2019 - OCTOBER 2022

Talend, San Mateo, CA

- Full lifecycle management of Talend's web properties, utilizing PHP and WordPress.
- Revamped Talend's marketing web properties infrastructure to Contentful CMS, Gatsby, GraphQL, React and Netlify,
- Extended website functionality by integrating 3rd party APIs and custom lead tracking functionality by developing plugins and tools. Both with PHP and later on using Javascript / React.

Web Developer

OCTOBER 2015 - OCTOBER 2017

CAKE, Redwood City, CA

- Full lifecycle management of all CAKE web properties, utilizing PHP and WordPress.
- Extended website functionality by integrating 3rd party APIs, lead tracking by developing plugins.

Web Developer

JULY 2013 - SEPTEMBER 2014

Revel Systems, San Francisco, CA

- Independently developed and managed the Revel Systems website.
- Created WordPress plugins to seamlessly integrate 3rd party APIs and lead tracking.
- Designed custom functionality to improve the content entry process in the WordPress back-end, increasing content update and publishing process for the marketing team.

Web Developer

AUGUST 2011 - FEBRUARY 2013

PD Media Lab, Santa Rosa, CA

- Created WordPress websites for agency clients.
- Built plugins to integrate 3rd party APIs and other custom functionality.
- Oversaw the complete workflow from development through to deployment.
- Converted high fidelity mockups to standard compliant PHP/HTML/CSS.

EDUCATION

Master of Arts (M.A.) - Informatics

SEPTEMBER 2004 - JUNE 2005

Halmstad University, Halmstad

Continued studies in Information Science.

Bachelor of Arts (B.A.) - Informatics

AUGUST 2001 - JUNE 2004

Halmstad University, Halmstad

Studied information science, Media and Communication and Pedagogy.
